

Dear mustapha

You've been living in HELL for the past 365 days. It's indeed sad the system you believe can protect you from the people (I think make your life a living HELL has done more damage in your life than the "human-trapkeepers". This is darkness moments of your life and how can you eat, drink, feel the taste of a food or drinking or have enough sleep when you are constantly receiving negative information every day, week and month.

for the past one year and at
some time you are battling with
a deathly disease call "TB" which
has been in your body for 3 years.
I definitely lost faith of DEMOCRAT
because many thought that this is
one of the best system in the world
and this system fail to protect a
basic human rights which the court
refuse to follow there own Constitution
which said victim of human trafficking
shouldn't be in prison but some
system lock me up and refuse to
set me free. What can you do
